

The State of Israel has been engaged in a difficult war on a number of fronts since the deadly terrorist attack in the South of the country on the Seventh of October. The mobilization of hundreds of thousands of reserve soldiers and the evacuation of the residents of dozens of communities in the South and in the North, together with the need to finance war-related expenses and provide assistance to those injured or harmed by the situation, have collectively impacted the economy.

Upon the outbreak of war, the First International Bank mobilized itself to assist customers through a variety of measures, which included the provision of significant benefits and reliefs. As the bank for the security forces, we have also been granting special benefits to reserve and standing army soldiers.

FIBI has expanded its support for communities and its assistance to those who have been harmed, among others, we have been accompanying Kibbutz Nir Oz and helping them, beginning with their immediate needs and providing support, and will be doing so until the Kibbutz is rehabilitated.

We pray for the return of all of the abductees and for a speedy recovery for the many people who have been injured. We share in the sorrow of the families of the fallen and those who were murdered and we salute the soldiers of the Israeli Defense Forces.

Eli Cohen, the First International Bank's CEO: "The Israeli economy is built on solid and healthy economic foundations and is a global leader in innovation and technology. In the past, we have been able to recover from difficult periods, swiftly returning to prosperity. The Israeli economy has the strengths that are needed to ensure that this will be the case again now, even though this is one of the most complex crises that the State of Israel has known.

The First International Bank entered into this challenging period from a position of strength, with one of the highest capital buffers in the Israeli banking system, high liquidity ratios and a high quality, diversified credit portfolio. All of these were the result of the cautious and responsible policies implemented, as well as the calculated, focused management of the risks, which expressed itself through the Bank's results and achievements. Furthermore, once the current crisis ends, we believe that it will enable the bank to grow and support the needs of the economy, in accordance with the Bank's policies.

The First International Bank remains committed to its customers, aiding those affected and supporting the community, as we navigate this crisis with the hope of a swift resolution."

The First International Bank of Israel

Reports Financial Results for the Year 2023

Tel Aviv, Israel – March 12, 2024. First International Bank of Israel (TASE: FIBI) one of Israel's major banking groups, today announced its results for the fourth quarter and full year period ended December 31, 2023.

Financial Highlights

- Net income of NIS 2,172 million in the year 2023; Return on equity 19.7%
- Net income of NIS 499 million in the fourth quarter of 2023; Return on equity - 17%
- Credit to the public grew by 1.8% in the year 2023
- Deposits from the public grew by 13.6% in 2023
- The customers' assets portfolio grew by 20% to NIS 672 billion
- Tier-1 shareholders' equity ratio of 11.35% and a liquidity coverage ratio of 156%
- The Bank's Board of Directors decided to distribute a dividend of NIS 269 million

Financial Results for the fourth quarter and full year 2023

The First International Bank today published its financial statements for the year 2023, which reflect a high level of profitability combined with the continued financial stability:

The First International Group's **net income** amounted to NIS 2,172 million in 2023, an increase of 30.3% by comparison with 2022. The **return on equity** was 19.7%, by comparison with 16.6% in 2022.

In the fourth quarter of the year, the net income amounted to NIS 499 million, an increase of 9.7% by comparison with the third quarter of 2023 and a decrease of 6.9% by comparison with the fourth quarter in the previous year. The **return on equity** was 17%.

Total revenue amounted to NIS 6,618 million in the year 2023, an increase of 22.2% by comparison with 2022. **Financing income from operating activities** increase by 28.3% in the year 2023, amounting to NIS 5,151 million, with the increase due primarily to the impact of the increase in shekel and dollar interest rates and the impact due to the general broadening in the scale of the Bank's operating activity.

Provision for credit losses amounted to NIS 502 million in the year 2023, representing 0.42% of the credit portfolio, an increase of NIS 379 million in comparison with 2022. There was an increase of NIS 337 million in the **collective allowance** for credit losses in 2023, primarily as a result of increased macro-economic uncertainty, in light of the uncertainty of economic conditions, due, among others, as a result of the repercussions of the war in Israel, the rise in interest rates and the potential for an economic slow-down.

High quality credit portfolio – the bank has a low ratio of non-performing loans. This ratio indicates the quality of the credit portfolio (measuring the balance of debts that are non-accrual or which are in arrears of 90 days or out of the credit to the public), and it remained at low levels and stood at 0.6%. In addition, over the past year, the Bank increased the **overall coverage ratio** (defined as the ratio of the overall allowance for credit losses to the Bank's total amount of credit to the public) from a rate of 1.12% to a rate of 1.5%.

Operating and other expenses amounted to NIS 2,877 million in the year 2023, an increase of 4.4% in comparison with 2022. This was primarily due to an increase in current salaries, as well as an increase in computing, marketing and advertising expenses.

In 2023, the **efficiency ratio** improved to 43.5%, by comparison with 50.9% in 2022. The bank continued to invest in efficiency programs, which include, among others, streamlining work processes, integrating automation into processes and implementing technological innovation.

Credit to the public increased by a rate of 1.8% by comparison with the same period in 2022 and amounted to NIS 119,240 million.

Deposits from the public have grown at a rate of 13.6% over the past year and amount to NIS 191,125 million.

The total customer assets portfolio increased by 20% in the past year and amounts to NIS 672.1 billion.

Equity attributed to the Bank's shareholders increased to NIS 12,071 million, an increase of 14.3% in comparison with 2022.

The tier 1 capital ratio increased to 11.35%, in comparison with 10.42% at the end of 2022.

The liquidity coverage ratio increased to 156%, in comparison with 127% at the end of 2022.

Considering the directives of the Supervisor of Banks in Israel regarding "*Planning of equity and the profits distribution policy*" and taking into account the background of a high level of uncertainty in the markets in Israel in the wake of the war, as well as the ongoing level of uncertainty in the global markets, the Bank's Board of Directors approved a cash **dividend distribution** of NIS 269 million to shareholders, reflecting a distribution of a dividend at a rate of 50% of the net income in the first half of 2023 and at a rate of 20% of the net income in the second half of 2023.

Looking ahead, the Bank's Board of Directors will continue to evaluate the Bank's dividend distribution policy, in response to developments and their impact on both the economy and on the Bank.
